## The Charm of Pretty Silver

Every woman takes great pride in her silver. She becomes more attached to it every year. It is oftentimes quite a problem to keep it clean and bright as it was when new. We are glad to recommend "Something better" for this purpose. A Silver Polish that truly polishes—liquid in form, and more economical and satisfactory than the old style polish.

**CAUTION!** The result of dark metallic stain on linen, etc., polishing silverware where there is no tarnish, the polish is certainly removing some silver each time polishing. Silverware polished with such injurious polishes, etc., after it has been washed a few times will have a dull, old (tin-plate) appearance, which requires so much attention and labor polishing so often such are equally injurious as salt-soda cleaners, etc. RESTORED TO ITS NEW ORIGINAL APPEARANCE (which is much desired as a distinction of Culture, Refinement and for Sanitary reasons) Engraved
